

Bibliography

The Bibliography section consists of two parts. On the one hand we have the BILIOMANES Catalog, a bibliographical repertoire bringing together books, book chapters, articles, dispatches and other texts from different countries having to do with schoolbooks. The other part of this section provides us with the titles included in the MANES Collection, published by the UNED (Universidad Nacional de Educación a Distancia) publisher, as well as the books and monographic issues of journals published or coordinated by researchers associated with MANES.
